Customer Reviews

Striking photographs offer toddlers a look at 30 familiar signs. Ages 3-6. Copyright 1987 Reed Business Information, Inc.

Everywhere you look there are signs. Many young children recognize the words on signs long before they learn to read, because they see them over and over again as they walk or ride around town.

Award-winning photographer Tana Hoban's brilliant color photographs of familiar signs bring written language alive for pre-readers.

My 3 year old grandson kept borrowing a copy of this book from the school library so I purchased this for his own personal copy. He loves it... and always wants me to drive him around to see the real signs. Unfortunately, I drove him downtown to see the "WALK" and "DON'T WALK" signs and

discovered there are NONE!! They have been replaced with the red hand symbol and the white walk figure. I printed from online the red hand symbol with the countdown and the white walk figure and taped those on the page with the "WALK" and "DONT WALK" signs. This book will help teach your toddler to read.

We have read this book so much in my house it is beginning to tatter. My little boy is obsessed with signs and this was perfect for him. It is very simplistic, so don't expect more than pictures of signs. He is 4 and he gives it five stars. Since it was purchased for him, his opinion is what counts.

love iT!

My autistic son loves road signs, and this was a very informative book. It's been his study guide actually. We love it.

Excellent for environment print

This is my son's favorite book, not only because of its simplicity and superb photography, but because it connected him with the signs he sees every day when we walk into town. I Read Signs has helped him feel comfortably familiar with his outside world.

Nice book that works well with the road sign puzzle and the set of Traffic Signs that we got for our two and a half year old grandson. He loves anything that has to do with cars and we use this interest to help him notice the world around him and to help him with his word association skills. Some obvious signs were not included...wish I had thought of creating this book!

This great little book was a hit with my 3 1/2 year old granddaughter! Each page features one sign giving her ample opportunity to absorb and discuss.
