ISBN-13: 978-0671619466

Package Dimensions: 9.3 x 7.6 x 1.4 inches

Shipping Weight: 2.1 pounds

Average Customer Review: 4.7 out of 5 stars 22 customer reviews

Best Sellers Rank: #1,127,838 in Books (See Top 100 in Books) #38 in [Books > Science & Math > Biological Sciences > Paleontology > Vertebrate](#) #5613 in [Books > Science & Math > Evolution](#) #79278 in [Books > Politics & Social Sciences > Social Sciences](#)

Customer Reviews

Paul thinks dinosaurs are fun, and he conveys his enthusiasm in this well-written account of their life and times. In the first part of the book he describes how the predatory dinosaurs (meat-eating dinosaurs, as opposed to herbivorous dinosaurs) evolved, what they looked like and how they lived. He dispels some commonly held notions: dinosaurs were not cold-blooded, slow or stupid; they were, in fact, the ancestors of birds. The second part of the book is an illustrated catalogue of all important predatory dinosaurs known to date, a new reorganization of predatory dinosaur taxonomy and systematics. Dinosaur are obviously the love of Paul's life, and he sometimes makes us forget that these extraordinary creatures have been extinct for at least 65 million years. In addition, as a paleontologist who does his own illustrations, he can back up his contention that dinosaurs "look neat."Copyright 1988 Reed Business Information, Inc.

I like the illustrations and much of the information but do not agree with everything the author says.

This was sent in good time, and is a wealth of information. It answers a lot of questions about dinosaurs and helps people learn about the traits of the mighty giants. Good illustrations in black and white, and a real good book for students to study and learn by!!!!

Excellent, informed and documented piece of work. Illustrations are as informative as they are entertaining, and Dr. Paul's background and bibliography is an exhaustive list of where to go to be respected and informed in the paleontology world. This book, combined with Rex Appeal by Peter Larsen are all you need to learn all you'd want about predatory dinosaurs of Mesozoic times. Was an excellent source, along with Rex Appeal and personal interviews with the late Jim Madsen, for the creation of my own book, Allosaurus Modernis.

Good starter book for dino lovers, my grandkids love to look at it!

Excellent!

This is one of the most important works devoted to predatory dinosaurs ever. The book was a great asset in my own research. Greg Paul is a genius. Buy this book. Dr. Stephen W. Templar, Author: rexGun

one of the best dinosaur books ever. they just need a updated version. I would try and find this book if you can!!!!
