Warning buyers now, the newer books don't come with codes! (Most don't now a days) did however, have a special when I brought this page up and said I could bundle with the code for like an extra 60 bucks. Now I don't know about you but that came out to be like 130-140 bucks total for me. (Both were on sale) Now at my college, the items separately? You were looking at least 100 bucks minimum for the code and 140 for the book. The bundle on here was an excellent deal. Only downside is? Risk of the code not potentially working, like mine unfortunately. Hoping it was just a misprint and I can get it situated with tech support. Like I said, if you want to take the risk, it's not a bad deal at all. Just warning you all ahead of time.

sooooo....I got my product a day late but it was due to renumbering of remodeled apartments w/ diff numbering...n e who.....the book was in tact no highlights....I actually am surprised but I read a lot of review before I decided to go w/ this company....good choice.....I wont be as hesitant next semester

As expected.

i didn't like how the book was a loose leaf, i would've rather had a text book

Delivery was on time since I asked for express delivery. The book quality is not so great. Inner binding of the book is slowly coming apart and with wear and tear of using it this semester even if I'm careful the book will fall apart. It helps me get through homework, but since it is a rental. Im

unhappy with it since it is starting to fall apart some more in my possession.

Great price not bad condition at all and recieved when said thank you i would recommand for people to rend or buy it

Good job

Book was suppose to have a code. And it had no code. That's the reason I bought the book.
