Design Like You Give A Damn : Building Change From The Ground Up

Synopsis

Design Like You Give a Damn [2] is the indispensable handbook for anyone committed to building a more sustainable future. Following the success of their first book, Architecture for Humanity brings readers the next edition, with more than 100 projects from around the world. Packed with practical and ingenious design solutions, this book addresses the need for basic shelter, housing, education, health care, clean water, and renewable energy. One-on-one interviews and provocative case studies demonstrate how innovative design is reimagining community and uplifting lives. From building-material innovations such as smog-eating concrete to innovative public policy that is repainting Brazil's urban slums, Design Like You Give a Damn [2] serves as a how-to guide for anyone seeking to build change from the ground up. Praise for Design Like You Give a Damn [2]: "No community is immune to the forces of climate change. If we have learned anything from Hurricane Katrina, it is that we must adapt. Good design accelerates the adoption of new ideas-and this book shows us how." Brad Pitt, Jolie-Pitt Foundation "It is not just about putting bricks to mortar. It is about taking the vision of creating a better world for others and making it tangible" Auma Obama, Sauti Kuu Foundation

Customer Reviews

"The resourcefulness of the projects in the book is inspiring, its information practical (see Stohr's chapter on financing sustainable community development) and its numerous factoids sobering." - The New York Times Magazine "Architecture With A Cause" - The Wall Street Journal

Architecture for Humanity is a nonprofit design-services firm dedicated to building a more sustainable future using the power of design. Through a global network of building professionals, Architecture for Humanity brings design and construction services to communities in need. Proceeds from the sale of this book will support the work of Architecture for Humanity.

I don't like the name, but it does convey the sentiment of the book. This book is filled with great practical and innovative advice for building a better world (no pun intended). Thought provoking.

My brother in law is a grad student in an architecture program and is very focused on sustainable, environmental and ethical building practices. He already has the first edition of this book, but after reviewing it I found that the two have a lot of different information. I purchased this for him as a Christmas gift and he has already said how great it was! Definitely a worthwhile read for students, professionals or those just interested in the field!!!

I think this one is better than the previous Design Like You Give a Damn, it was a great little resource for my thesis on informal settlements as this aggregates so many different projects into one book and provides photos and snippets of information that could be used to find more detailed information elsewhere. Happy with this purchase.

This is a great book if you are starting to get the feeling on do something great for the world, this is a good guide to understand what's going on out there, maybe if they included more details about the designs and projects all had enriched the experience of this book.

Facinating

This book is really inspiring. The work that architecture for humanity does is really amazing. We can learn a lot from what they are doing. The projects look simple and sustainable at the same time. Really good book.

I loved it, It is very usefull and helpfull for my future engagement in architecture especially for nowadays. Great Book

Very inspirational to read! Im very excited to look further into it .
