Making Mountains: New York City And The Catskills (Weyerhaeuser Environmental Books)

Synopsis

For over two hundred years, the Catskill Mountains have been repeatedly and dramatically transformed by New York City. In *Making Mountains*, David Stradling shows the transformation of the Catskills landscape as a collaborative process, one in which local and urban hands, capital, and ideas have come together to reshape the mountains and the communities therein. This collaboration has had environmental, economic, and cultural consequences. Early on, the Catskills were an important source of natural resources. Later, when New York City needed to expand its water supply, engineers helped direct the city toward the Catskills, claiming that the mountains offered the purest and most cost-effective waters. By the 1960s, New York had created the great reservoir and aqueduct system in the mountains that now supplies the city with 90 percent of its water. The Catskills also served as a critical space in which the nation's ideas about nature evolved. Stradling describes the great influence writers and artists had upon urban residents - especially the painters of the Hudson River School, whose ideal landscapes created expectations about how rural America should appear. By the mid-1800s, urban residents had turned the Catskills into an important vacation ground, and by the late 1800s, the Catskills had become one of the premiere resort regions in the nation. In the mid-twentieth century, the older Catskill resort region was in steep decline, but the Jewish "Borscht Belt" in the southern Catskills was thriving. The automobile revitalized mountain tourism and residence, and increased the threat of suburbanization of the historic landscape. Throughout each of these significant incarnations, urban and rural residents worked in a rough collaboration, though not without conflict, to reshape the mountains and American ideas about rural landscapes and nature.

Customer Reviews

David Stradling's Making Mountains is the definitive and indispensable Catskill Mountain history, the best thing written on the Catskills in 35 years. The book is thesis driven - showing how local rural residents and city visitors collaborate to create the kind of mountain environment that serves the interests of both, and that achieves the tangible realization of our culture's conception of "mountains" envisioned by artists and writers. The narrative is engrossing. Stradling combines a love of the Catskills and its people with academic rigor. This book is the real thing. If you are interested in the mountains, you need this book.

I am enjoying this book very much. I was born in the Catskills and I am learning so much that my parents never told me. It is very well written. Making Mountains: New York City and the Catskills (Weyerhaeuser Environmental Books)
