## **Customer Reviews**

Sir Arthur Conan Doyle (1859-1930) was born in Edinburgh and studied medicine. He began writing while he tried to grow his practice and, with 1887's *A Study in Scarlet*, created Sherlock Holmes, one of the most famous literary characters of all time.

These versions of the Holmes stories are among the best that were produced for radio. They are well written and excellently acted.

It was as good as volume 2. A great group of actors performing various parts. The sound quality was clear and crisp. A fine value for the money.

I love pretty much all of the variations of the Sherlock Holmes classics, but this one was dry, my

fault though, I did not read that it was from a BBC radio series. It's not as good as the audio books narrated by Simon Prebble, there's too much of a "in a can " effect that makes it more annoying to listen to, would have been better if done in a more sound buffering setting.

Good quality
