Customer Reviews

Methods for Modern Sculptors by Ronald D. Young and Robert A. Fennell. 1981 trade paperback published by Sculpt-Nouveau.

Very Imformative, and written for the hands use contended within it covers.....

The best book on the market for the secrets of bronze casting. You will not need another book.

Book arrived on time, as described, well packaged. Thank you!

This practical and easy to understand book is the best I have seen yet out of many I have perused.

I searched high and low for books that were both practical, informative and realistic in regards to the ceramic shell casting process. This is the only one I have found of any worth at all. It includes formulas, techniques that are aimed at the artist, as well as feedback from someone with many hours in the foundry. I suggest this to anyone interested in artistic bronze casting and the ceramic shell process.

A text book that completely explains the "shell casting" process from A to Z....a must read..... I have used this book in my "bronze casting " classes for 10 years..a must own.....
