Customer Reviews

Digital Destinations develops virtual reality sightseeing tours and marketing products for the consumer and commercial marketplace. By combining 360 x 360 panoramic images with the latest multimedia applications and location-centric content, we create an accurate simulation of travel to that destination, all from the convenience of your personal computer. Products are also helpful in exploration and orientation prior to travel. Our understanding of technology and usability, allows us to create inspiring products that really give the user an authentic experience.

I just love the Newport Mansions. This CD is great because I can never remember all the details when I visit the mansions, and this CD lets you pan around and up to the ceiling and down to the carpet, also zooming in. You can see all the details that give the rooms their luxurious feel. Also, it's great because I haven't been to all the mansions and through the virtual tours I can see which one I most want to visit next. Now, if they could just figure out a way to get the CD to give you that musty dusty smell of the actual mansions... Seriously, this is very cool and if you are only visiting Newport for a short time, it's worth it to see which mansions you really want to see in person. Jilla

This is a very cool CD showing you the various Newport mansions. You can pan around inside the rooms, looking at all the walls, even the floor and ceiling. I like it because when you visit the mansions there isn't time enough to see them all, and with this CD I can see them all. Also, I can go back to the rooms that I like and study the details in that room. It is very interesting. Anyway, I would recommend this CD. It makes great use of new technology and is fun and easy to use.

After the other reviews in this column piqued my interest, I picked this CDrom up in one of the Mansions stores a couple of weeks ago, and boy, am I glad I did! Great insight to the construction of the mansions including, the materials used, styles used, builders etc.. There is a brief narration for each one that gives dates & facts, along with 8 classical tunes that play at random as you wander about. The only constructive criticism is that you don't get narration for each room as you enter, just at the beginning of each VR tour. I'm sure it would've been too costly and time consuming to do that anyway. But, you can even do an auto tour where you sit back and relax, while the camera pans to different rooms, or you can do the manual tour at your own pace. Great quality! Runs smoothly with no popping or skipping, and the picture quality is terrific! You can zoom, spin, look down, up, to get a closer look at that special vase, or to look at the gilded ceiling tiles. Great for those who have never been to get an inside look, or a great momento for those who have visited the 10 mansions from the preservation society. You'll feel like you've wandered back in time to the Victorian age on Bellevue Ave.....
