Best Sellers Rank: #902,256 in Books (See Top 100 in Books) #95 in Books > Children's

Books > Education & Reference > History > Prehistoric

Customer Reviews

Very good information, and also well written for an early age group. Not so common to find easy read about the topic of early man, so greatly appreciated. A few suggestions for this particular edition, and perhaps others in this series, although I have only read this one:1-Bigger pictures in color with perhaps a caption under the picture further outlining what is being shown.2-Table Of Contents and an Index. As I am trying to use these as beginning research tools, having these standards for nonfiction books with this reading level would be a great asset.Even so, really great book for ages 6-10 for beginning research skills and facts about early man,

I like these simple narratives. We learn these things but rarely get any particular completed descriptions.Great stuff for children.Theocpowell@gmail.com

ok

This is a great series get them all and you will learn so much no age limit here. You only need to take in information

A short story for children.

Best passage from the book" Natural Selection is about species adapting to changes in their environment and becoming a species that is the best at survival."

Among the 4 kids I have 3 are aged 5, 7 and 12. This is an age where they all are extremely eager to learn and digest information presented maximum appealing. The Legends of History series is an outstanding work to catch kids attention with instructional and engaging pictures also inviting us parents to have very valuable follow up discussions. These increase bonding and much spent quality time for joyous interactions. I highly recommend this series for everyone having children within the authors announced age range to provide a long term adventure, support imagination and enhance learning sometimes zillion times more engaging and interesting than most school lessons offer. great work!
