# Computing In Anesthesia And Intensive Care (Developments In Critical Care Medicine And Anaesthesiology)

## **Synopsis**

There is a tendency of an increasing number of signals and derived variables to be incorporated in the monitoring of patients during anesthesia and in intensive care units. The addition of new signals hardly ever leads to the deletion of other signals. This is probably based on a feeling of insecurity. We must realize that each new signal that is being monitored brings along its cost, in terms of risk to the patient, investment and time. It is therefore essential to assess the relative contribution of this new signal to the quality of the monitoring process; i. e. given the set of signals already in use, what is the improvement when a new signal is added? Beyond a certain point the addition of new information leads to new uncertainty and degrades the result (Ream, 1981) In the diagnostic process, it is possible to evaluate "result" in an objective, qualitative way. The changes in the sensitivity and specificity of the diagnosis as a result of the addition or deletion of a certain variable can be calculated on the basis of false negative, false positive, correct negative and false negative scores. Different methods for multiple regression analysis have been implemented on computers (Gelsema, 1981) which can support such decision processes. In monitoring, the situation is much more complex. Many definitions of monitoring have been given; the common denominator is that monitoring is a continuous diagnostic process based upon a (semi)continuous flow of information. This makes simple assessment methods useless.

## **Book Information**

Series: Developments in Critical Care Medicine and Anaesthesiology (Book 5)

Hardcover: 448 pages

Publisher: Springer; 1983 edition (September 30, 1983)

Language: English

ISBN-10: 0898386020

ISBN-13: 978-0898386028

Shipping Weight: 2 pounds

Average Customer Review: Be the first to review this item

Best Sellers Rank: #18,523,888 in Books (See Top 100 in Books) #49 in Books > Medical Books > Medicine > Computer Applications #1947 in Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Critical Care #2613 in Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Anesthesiology

## **Customer Reviews**

...the book is strongly recommended to the tyro who wishes to obtain a general view of the subject

and the more knowledgeable reader who will find something to pique his or her interest.' Canadian Anaesthetists' Society Journal (September 1984)
