## Customer Reviews

Best study tool for PMHNP getting ready to test! Passed first time on boards!

Excellent review book!

very helpful for studying for ANCC exam. Some errors are in it but overall VERY helpful

An absolute must for preparing for the Board Certification exam.

Fantastic book

Great review!

Bought it for ANA online review course (it was mandatory). My favorite error was in a table on

suicide assessment where it tells the NP to assess for "completed suicide" in client or family... Must be an interesting assessment if the client successfully suicided. "Yep, you're dead!"

This is a great preparation book that gives a good overview of information needed for the ANCC -- it was the main resource that I used to study with. My only complaint is that there were several errors in the book in both the content and practice test.
